"A UNITED FAMILY, CONTINUOUSLY OFFERING ABRASIVE SOLUTIONS, BASED ON A REALISTIC MUTUAL AGREEMENT."

Kovax is a producer and supplier of innovative and time saving quality abrasives. Kovax Europe B.V. has its roots in Tokyo, Japan, where the headquarter of the holding company Kovax Corporation is situated. The European market is served from our head office in Almelo, the Netherlands, while the products are produced in Japan, for more than 85 years. This enormous amount of knowledge in combination with one of the most modern factories worldwide enables us to deliver products, that save time and never fail to amaze. Since its foundation in 1930, Kovax has become the undisputed number

1 abrasive brand in Asia. In Europe a yearly growth up to 20% in a complicated, conservative, and highly competitive market is just yet another proof of the unique and unrivalled Japanese quality. Thanks to years of research and development, Kovax products are not only implemented in the automotive industry, but also found their way to the wood, OEM and yacht industry.

THE KOVAX FAMILY

For Kovax Europe B.V., partners are more than just business relations. Nowadays we have partners in more than 40 countries. All of them are part of the Kovax family. This family is built up on the idea that long term success is a

group effort with clear mutual agreements and strong loyalty as our foundation. We do not simply sell the better product, we offer a complete concept to create mutual benefit in the long run.

TOP PRODUCTS

MAXCUT P60 - P180

THE NUMBER 1 SOLUTION WHEN SANDING HARD PUTTY AND METAL.

ADVANTAGES MAXCUT

The Maxcut products have specially hardened Aluminium oxide grains, which score a 9.8 on Mohs scale of mineral hardness. Compared to the hardest mineral, which is industrial produced diamond with a score of 10, this is nearly the hardest existing mineral and thus perfectly suited for extremely hard sanding work. Thanks to its open structure clogging is topmost prevented.

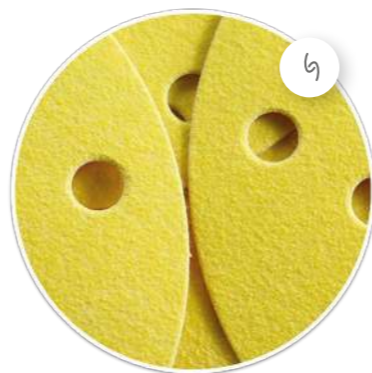

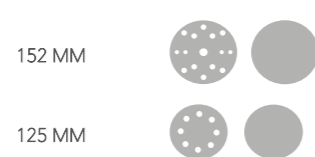

TRI-PRO P40 - P600

PRICE-PERFORMANCE WINNER FOR THE WHOLE SANDING PROCESS, FROM SANDING TO BARE METAL TO SANDING PRIMER.

ADVANTAGES TRI-PRO

Tri-Pro can be used for all sanding steps, from sanding to bare metal to sanding primer. The amount of aggressiveness is reflected in the high cutting power of Tri-Pro. At the same time the uniformity of the sanding scratches prevents intensive refinishing work.

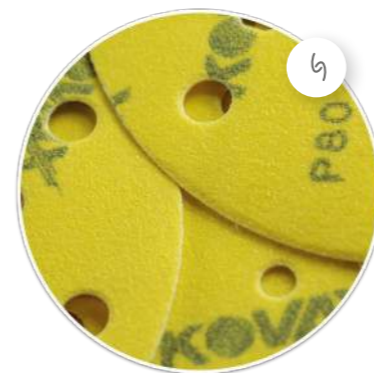

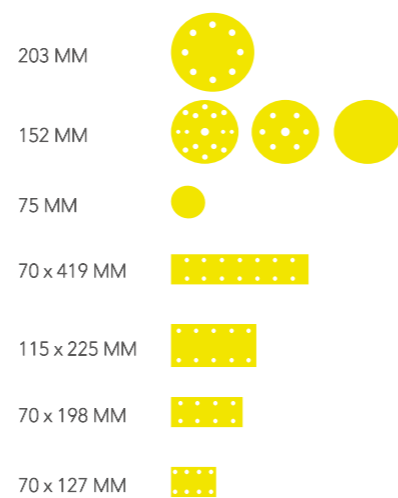

PREMIUM P40 - P600

PREMIUM IS USED FOR THE COMPLETE SANDING PROCESS, FROM SANDING TO BARE METAL TO SANDING PRIMER.

ADVANTAGES PREMIUM

The aggressiveness of Premium products results in a high cutting power. At the same time the uniform sanding scratches prevent intensive refinishing.

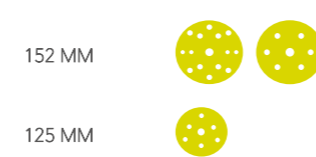

MAXFILM P80 - P600

MAXFILM STANDS FOR MAXIMUM DURABILITY FOR ALL YOUR SANDING WORK, FROM SANDING TO BARE METAL TO SANDING PRIMER.

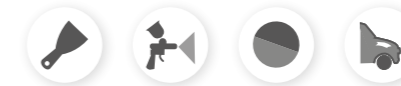

ADVANTAGES MAXFILM

The film backing of Maxfilm allows a more direct contact with the sanding surface and prevents the grains to drop into the backing. In combination with its double anti-clogging coating this results in a significantly longer sanding life. The printed P-value on top of the disc ensures maximum ease of use.

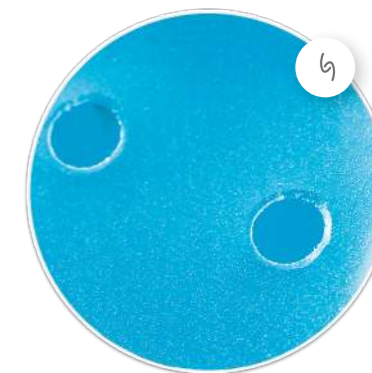

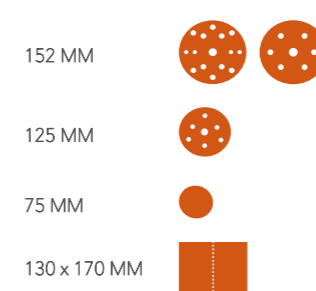

SUPER ASSILEX K240 - K1500

THE NEW AND UNIQUE WAY OF DRY SANDING, UNIFORMITY AND FLEXIBILITY THAT AMAZE.

ADVANTAGES SUPER ASSILEX

The innovative latex backing and the unique grain structure result in extremely uniform and shallow scratches. Maximum control during primer and topcoat sanding allows up to 50% time saving. Super Assilex prevents potential problems in the rest of the sanding process.

MAGIC DISC 320

SPECIALLY DEVELOPED SANDING DISC FOR E-COAT AND VERY HARD, MAT CLEAR COAT SANDING.

ADVANTAGES MAGIC DISC

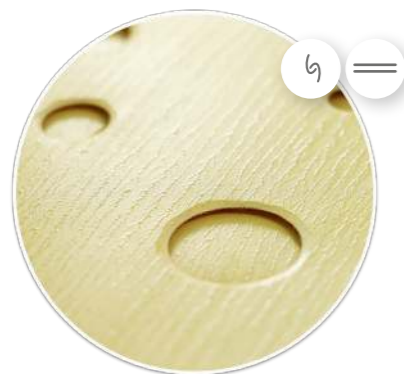

The Magic Disc with its film backing, the new developed diamond grain and the new generation 2.0 anti-clogging coating, has an unbelievable long sanding life on hard coatings. High aggressiveness comes together with very uniform scratches.

USE **SPY SPRAY** WHEN SANDING PUTTY AND PRIMER.

PAGE 47

FOR THE **BEST & FASTEST RESULTS**, USE 5 MM ORBIT FOR ALL OUR PRODUCTS.

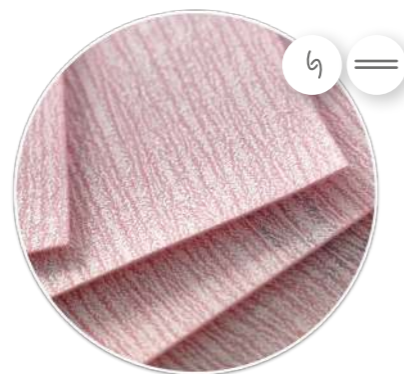

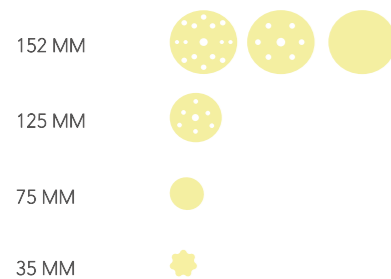

YELLOW FILM
P800 - P2000

THE NUMBER 1 SOLUTION FOR BLENDING ZONES, WITH THE GUARANTEE FOR A PERFECT, NON-VISIBLE TRANSITION FROM OLD TO NEW CLEAR COAT.

ADVANTAGES YELLOW FILM

The film backing in combination with a high ratio of anti-burning coating allows a cool sanding process. Consequently burning spots can be brought to a minimum and the risk of deep scratches is reduced significantly. Yellow Film is ideal for the removal of orange peel, for high gloss wood finish and for top coat sanding.

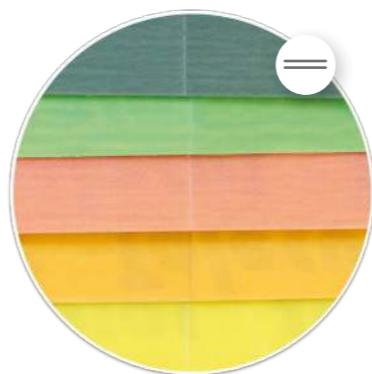

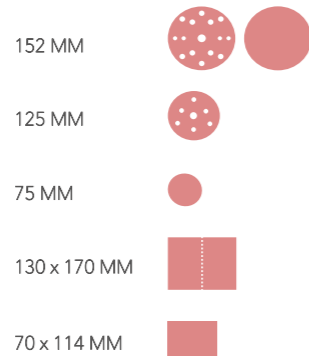

TOLEX
K1500

TOLEX IS A POLISH TIME REDUCING CHAMPION WITH A VERY FINE SANDING SCRATCH.

ADVANTAGES TOLEX

The special combination of micro grain used for the production of Tolex and its innovative latex backing, results in a sanding scratch of less than 1 Micron. A scratch this fine, significantly reduces polishing time. Thanks to the dry sanding process the risk of sanding through the clear coat is brought to the minimum.

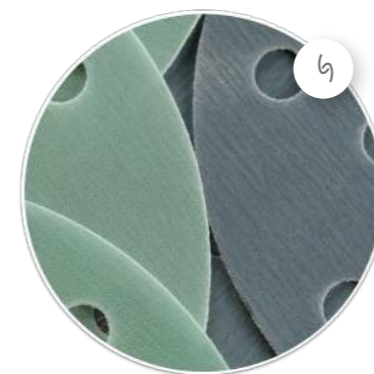

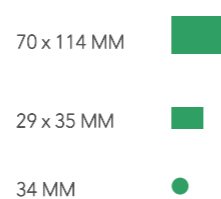

TOLECUT
K800 - K3000

THE WORLD CHAMPION WHEN IT COMES TO DRY IMPERFECTION REMOVAL.

ADVANTAGES TOLECUT

Tolecut is a dry sanding system. Without the use of water it is always possible to see how far the imperfection has been removed. This ensures process safety and sanding through the clear coat can be prevented easily. Tolecut is unique in its cutting power and thanks to its flexibility when using the tolecard it is also suitable for concave and convex areas. The ease of use makes it a must have for every dent professional.

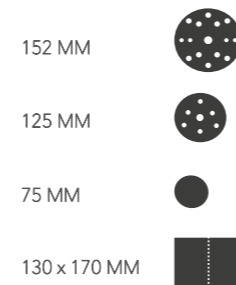

BUFLEX DRY
K2000 - K3000

THE FINEST ABRASIVE FOR MAXIMUM POLISH TIME REDUCTION.

ADVANTAGES BUFLEX DRY

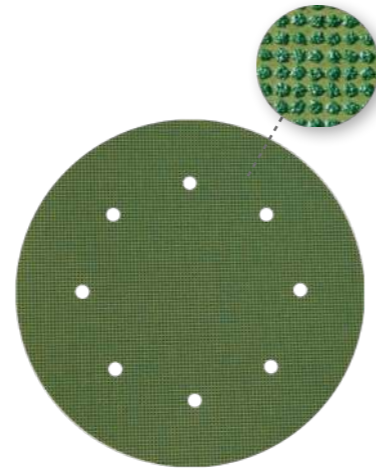

The ultra flexible, innovative latex backing with a unique grain structure ensures extremely uniform scratches. The especially developed female-female velcro ensures process safety and prevents scratches caused by hard velcro. Buflex Dry remains the coating structure.
